Website Monitoring – Coursework 1A

Author: Robert Neagu

Student ID: 2318538N

Solution

The solution has been tested on University's environment, it compiled successfully and seems to work correctly with no memory leaks.

Bugs

There does not seem to be any bug that I am aware of.

Limitations

There does not seem to be any significant limitation that I am aware of.

Originality

This is my own work except the tree iterator which is based on: <https://gist.github.com/Knifa/1318375>

This AVL C implementation is based on the Java version from [Moodle](#)
